CANDIDATE SUMMARY

Undergraduate student with hands-on experience in product research, usability evaluation, and wireframing & prototyping, seeking a UX internship to further develop user-centered and feedback-driven design skills.

EDUCATION

University of Toronto Mississauga

Mississauga, ON, Canada

Bachelor of Arts – BA, Double Major in Communication, Culture, Information & Technology (CCIT) and Technology, Coding & Society (TCS)

September 2024 – May 2028

- **GPA: 3.49 / 4.0**
- **Honors/Awards: UTM Entrance Awards**
- **Major Coursework: CCT111: Critical Coding (4.0); CCT202: Human-Machine Communication (4.0); CCT204: Design Thinking I (3.7)**

INTERNSHIP EXPERIENCE

Jiangxi Ruobang Science & Technology Co., Ltd.

Shenzhen, Guangdong, China

(Electronic packaging materials manufacturer)

Product Research Intern

May 2025 – June 2025

- Supported sales and product teams by consolidating product information and customer requirements, improving internal clarity around product offerings
- Organized product specifications and application details into structured reference materials used for internal communication
- Conducted preliminary research on product applications and usage contexts to support clearer product understanding
- Participated in cross-functional meetings to align research findings with sales and product workflows
- Contributed to documentation that supported day-to-day sales and product-related operations

San Ying Packaging (Jiang Su) Co., Ltd.

Taicang, Jiangsu, China

(Electronic packaging materials manufacturer)

Business & Product Support Intern

March 2024 – June 2024

- Conducted market research on composite hose products to identify industry applications and demand patterns
- Collected and organized customer satisfaction feedback to support internal product and service evaluation
- Contributed to environmentally focused product discussions by supporting plastic materials selection aligned with international standards

- Assisted the team in aligning product materials and design considerations with international environmental compliance requirements
- Accompanied client visits to observe customer needs and real-world usage contexts
- Analyzed the company's positioning within domestic and international markets to support business understanding

EXTRACURRICULAR ACTIVITIES

Taiwanese (R.O.C.) Student Association at the University of Toronto Mississauga (ROCSAUT) **Mississauga, ON, Canada**

Events Associate May 2025 – Present

- Planned and coordinated student events by proposing ideas, defining goals, and identifying participant needs
- Collected and synthesized participant feedback to guide iteration and improvements for future events
- Collaborated with team members to refine event flows and on-site experiences
- Facilitated brainstorming and planning discussions to shape event concepts and formats
- Supported logistics and materials sourcing to ensure smooth event execution
- Evaluated event outcomes using attendance, engagement, and qualitative feedback

ICCIT Council, Institute of Communication, Culture, Information & Technology at the University of Toronto Mississauga **Mississauga, ON, Canada**

Council Member January 2025 – Present

- Represented student perspectives in council meetings to support improvements in academic and student experience
- Provided structured student feedback on academic programs and courses for departmental consideration
- Offered usability-focused suggestions to improve the ICCIT website's layout, navigation, and information clarity
- Engaged in discussions with faculty and student representatives to address department-related issues
- Supported communication of council updates between the department and student body

The Design Hub at the University of Toronto Mississauga **Mississauga, ON, Canada**

Workshop Participant September 2025 – Present

- Participated in design thinking and innovation workshops focused on problem framing and idea generation
- Engaged in collaborative activities to explore user-centered approaches to design challenges
- Gained foundational exposure to prototyping and iterative design processes
- Observed how interdisciplinary teams approach design and solution development

Local Neighborhood Community Volunteer Service **Toronto, ON, Canada**

Community Outreach Volunteer June 2023 – August 2023

- Conducted door-to-door outreach to gather resident feedback on community needs
- Documented recurring concerns related to traffic management near schools and public space design

- Communicated resident feedback to community organizers to support improvement initiatives
- Assisted in organizing qualitative feedback for community planning discussions
